

02 – Product Definition (PRD)

Summary

The Career Counseling Management Application is a low-code solution built to digitize and manage student counseling interactions. It replaces manual spreadsheet-based processes with a structured system that supports efficient data entry, historical tracking, and analytics-driven reporting.

Goals

- Centralize all counseling session records
- Reduce administrative and reporting workload
- Enable consistent, automated analytics
- Improve visibility into service usage and engagement

Success Metrics

- **Adoption:** 100% of counseling sessions logged through the application
- **Efficiency:** Monthly reporting time reduced by at least 50%
- **Automation:** Dashboards refresh automatically without manual intervention
- **Engagement:** Feedback emails sent after every completed session

Users & Personas

Persona: Career Counselor

- Needs: Fast and reliable session logging and follow-up
- Pain Points: Manual data entry, fragmented student history, repetitive reporting tasks

Jobs-to-Be-Done

- Log a counseling session using a structured form
- Select session type (e.g., CV review, interview preparation)
- Record qualitative notes
- Trigger a feedback email automatically

Core Use Cases

User Story: As a counselor, I want to log a student counseling session so that the interaction is recorded digitally.

- Acceptance Criteria: The system captures student ID, session date, session type, and notes and stores them successfully.

User Story: As an administrator, I want to view monthly analytics so that I can report on counseling activity.

- Acceptance Criteria: Dashboards refresh automatically and display session counts, trends, and distributions.

MVP Feature Set

- Counseling session logging form
- Student lookup by ID
- Excel-based data storage
- Power BI reporting dashboards
- Automated feedback email distribution
